## Software Used in this Lab

In this lab, you will use MySQL is a Relational Database Management System (RDBMS) designed to efficiently store, manipulate, and retrieve data.

To complete this lab you will utilize MySQL relational database service available as part of IBM Skills Network Labs (SN Labs) Cloud IDE. SN Labs is a virtual lab environment used in this course.

#### **Database Used in this Lab**

The database used in this lab is an internal database. You will be working on a sample HR database. This HR database schema consists of 5 tables called EMPLOYEES, JOB\_HISTORY, JOBS, DEPARTMENTS and LOCATIONS. Each table has a few rows of sample data. The following diagram shows the tables for the HR database:

# SAMPLE HR DATABASE TABLES

EMPLOYEE:	S														
EMP_ID	F_NAME	L_NAME		SSN B_D			SEX	ADDRESS		JOB_ID	SALARY		MANAGER_ID		DEP_ID
E1001	John	Thomas		123456	23456 1976-0		М	5631 Rice, OakPark,IL		100	100000		30001		2
E1002	Alice	James		123457	1972-0	7-31	F	980 Berry In	Elgin,IL	200	80000	)	30002		5
E1003	Steve	Wells		123458	1980-0	8-10	М	291 Springs,	Gary,IL	300	50000	)	30002		5
JOB_HISTO	RY						JC	BS							
EMPL_ID	START_D	START_DATE JO		S_ID DEPT		D	JO	B_IDENT	JOB_TIT	JOB_TITLE		MIN_SALARY I		MA	X_SALARY
E1001	2000-01	2000-01-30 100			2		10	100 Sr.		Architect		60000		100	000
E1002	2010-08	2010-08-16 2		5		20		0	Sr.SoftwareDevelope		oper	60000		80000	
E1003	2016-08	2016-08-10 300		5			30	0	Jr.SoftwareDeveloper		40000 6		600	00	
DEPARTME	NTS							LOCATIO	ONS						
DEPT_ID_DEP	DEP_NA	DEP_NAME		MANAGER_ID		roc_id		LOCT_ID		DEP_ID_LOC					
2	Architec	Architect Group		30001		L0001		L0001		2					
5	Software Development		30002		10002		L0002		5						

L0003

## **Objectives**

After completing this lab, you will be able to use phpMyAdmin with MySQL to:

L0003

30003

- Create a database.
- Create tables using SQL scripts
- Load data into tables

#### **Exercise**

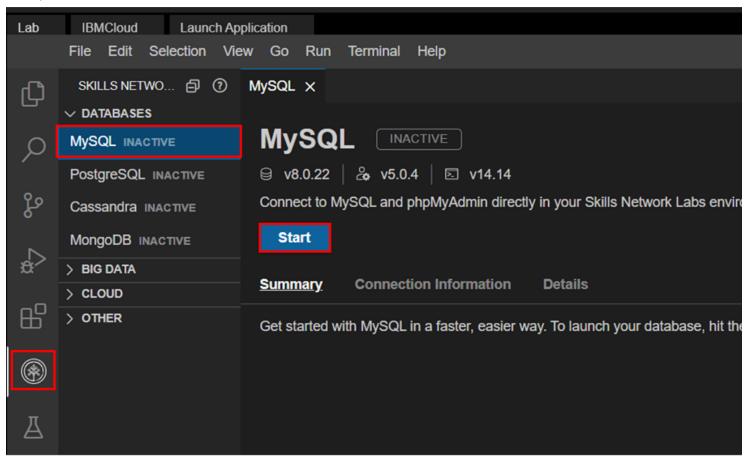

In this exercise through different tasks, you will learn how to create tables and load data in the MySQL database service using the phpMyAdmin graphical user interface (GUI) tool.

#### Task A: Create a database

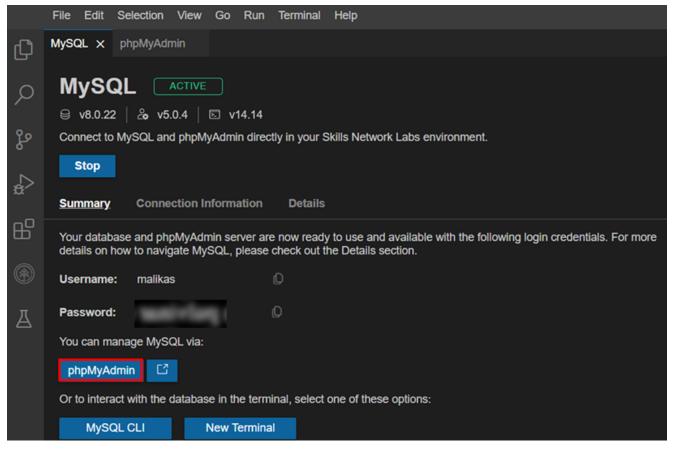

1. Click on Skills Network Toolbox. In Database section, click MySQL.

To start the MySQL click Start.

about:blank 1/10

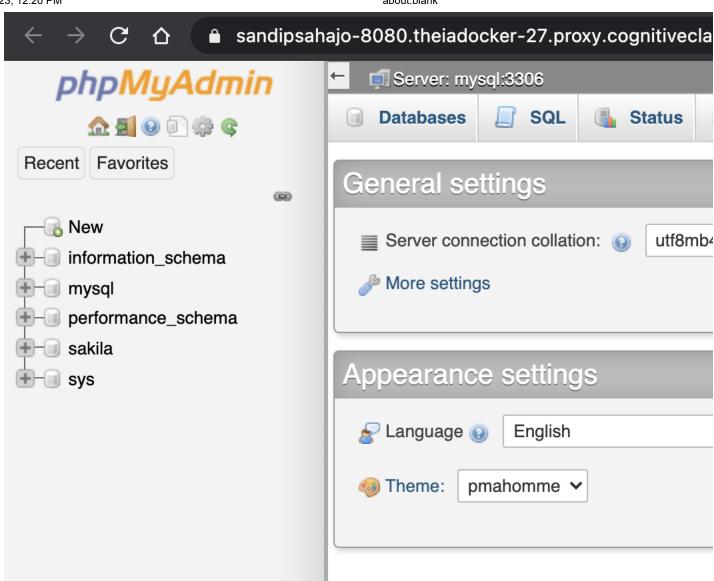

2. Once MySQL has started, click on phpMyAdmin button to open phpMyAdmin in the same window.

3. You will see the phpMyAdmin GUI tool.

about:blank 2/10

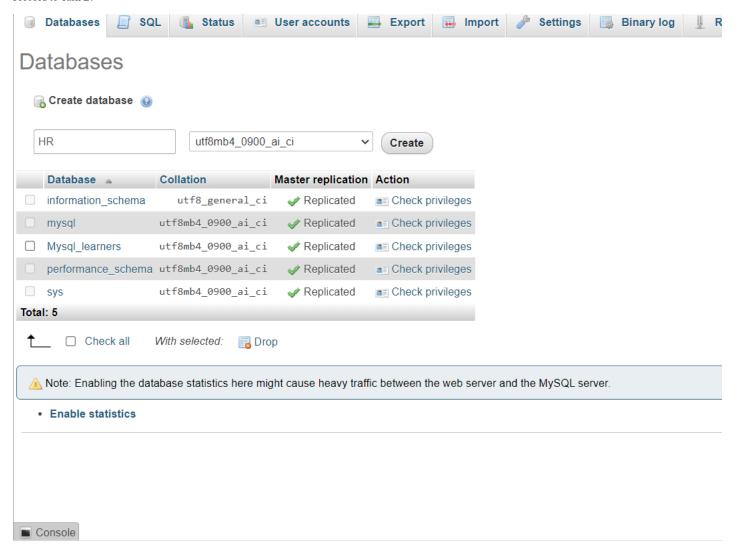

about:blank 3/10

4. In the tree-view, click New to create a new empty database. Then enter HR as the name of the database and click Create.

The encoding will be left as utf8mb4\_0900\_ai\_ci. UTF-8 is the most commonly used character encoding for content or data.

Proceed to Task B.

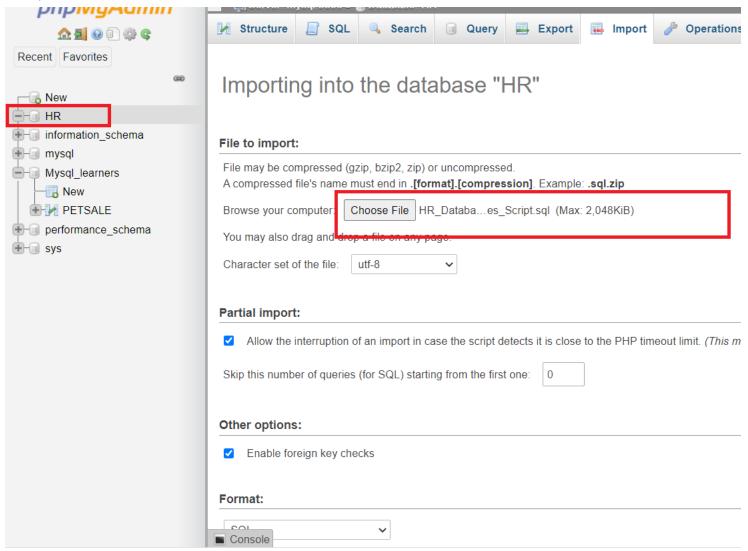

### **Exercise 1: Create tables using SQL scripts**

In this exercise, you will learn how to execute a script containing the CREATE TABLE commands for all the tables rather than create each table manually by typing the DDL commands in the SQL editor.

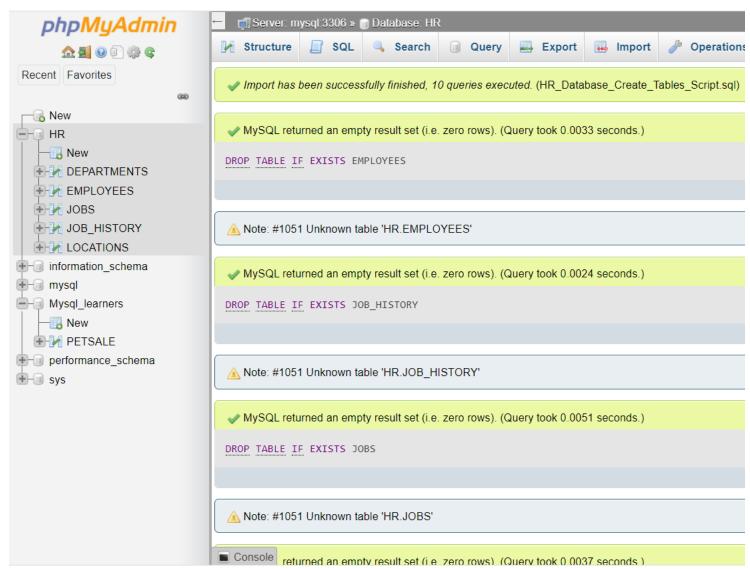

- 1. Download the script file to your computer:
  - HR\_Database\_Create\_Tables\_Script.sql
- Select the HR database. Later click on the Import tab.
- Click on **choose file**. Browse for the file and upload it .
- Later scroll down and click on Go.

about:blank 4/10

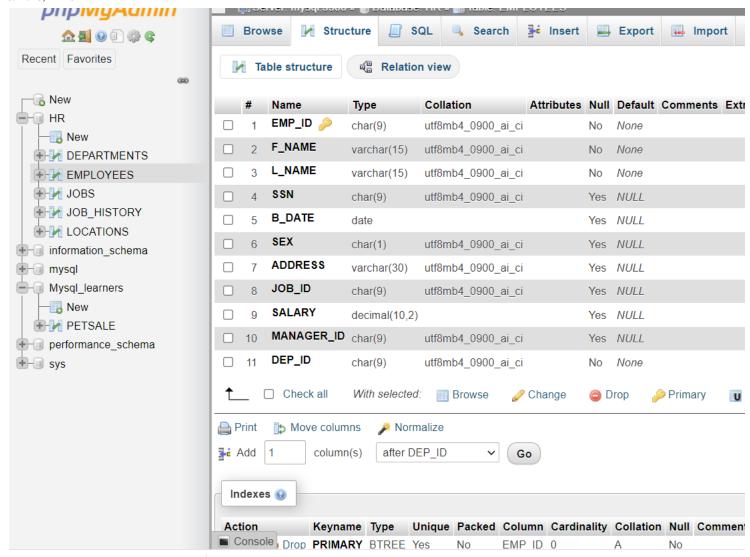

• The script then gets imported successfully.

about:blank 5/10

• Click on any of the tables and you will see its Table Definition (that is, its list of columns, data types, etc).

about:blank 6/10

#### **Exercise 2: Load data into tables**

In this exercise, you will learn how data can be loaded into MySQL. You could manually insert each row into the table one by one, but that would take a long time. Instead, MySQL (and almost every other database) allows you to load data from .CSV files.

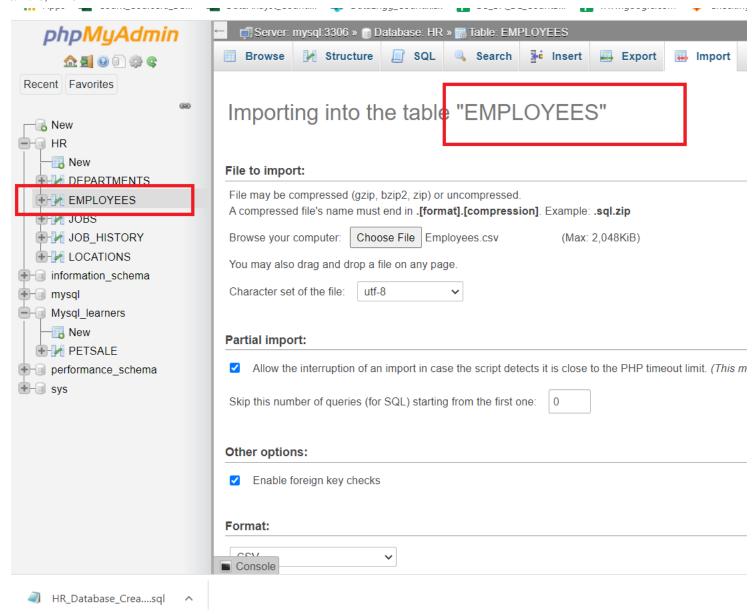

The steps below explain the process of loading data into the tables you created earlier in exercise 1.

- 1. Download the 5 .csv files below to your local computer:
  - o Departments.csv
  - Employees.csv
  - Jobs.csv
  - <u>Locations.csv</u>
  - JobsHistory.csv

To load each table do the following steps.

- · Select each table .
- Click on Import tab.
- Select the csv file and click on Go to load the csv file.

about:blank 7/10

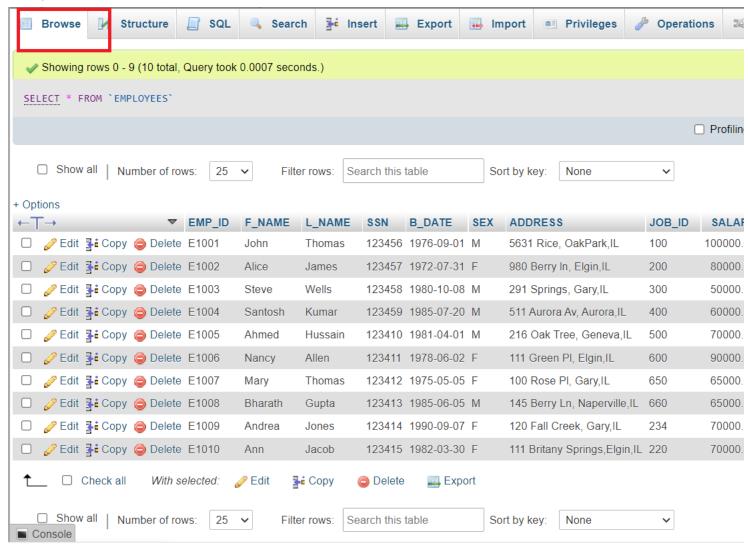

Once the tables are loaded, you will get a message that the records are inserted successfully.

about:blank 8/10

Further you can click on browse and view the data of each table.

about:blank 9/10

Congratulations! You have completed this lab, and you are ready for the next topic.
